

EM-E2100 : EM EAS SYSTEM

Electronic Magnetic (EM) **EM LIBRARY SYSTEM**

EM System is manufactured using high quality fiber reinforced poly plastic material. It has hollow design, which makes it aesthetically pleasing and resistant to abrasion and wear.

It produces high level detection in all three label orientations with an enhanced aisle width of up to 80cm –subject to the configuration and onsite electrical noise level.

This innovative new system has been designed to meet the exit protection needs of a wide range of applications including: high-end cosmetic stores, libraries, archives, book stores, pharmacies, wine shops, galleries etc.

EM System is supplied on a worldwide basis.

Controller

PRODUCT ADVANTAGE

High Sensitivity

Alarm Light

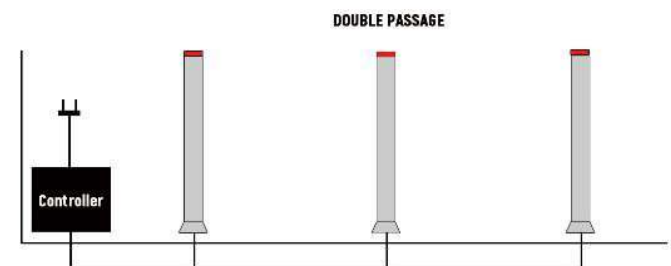

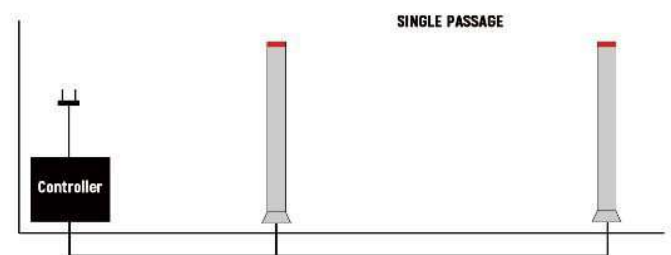

Low Power Consumption

Alarm Volume

OPERATIONS

Frequency	920.50 MHz ~ 924.50MHz
Recognition Rate	≥ 100 labels / sec
Detection Range	80cm
Material	FRP
Frame Color	Silver
Dimension	1500*535*25mm
Operating Voltage	110 ~ 220V
Temperature	-5°C to 50°C

OPTIONAL PARTS

EM LABEL

EM DEACTIVATOR
